Central European Economic Journal

Review Form

In order to prepare the article in the best possible way, pay attention to the issues of your manuscript subject to the reviewers' assessment. The form (implemented in the ScholarOne system) of original research paper is presented below:

Please state any conflict(s) of interest that you have in relation to the review of this paper (state “none” if this is not applicable):

1. Abstract: Is abstract structured in accordance with the requirements of the Journal?
2. Motivation and contribution: Does the paper contain new and significant information that improve or build on existing research? What is theoretical, empirical and/or practical contribution of the paper?
3. Literature: Does the paper present an adequate understanding of the relevant literature and refer to literature sources in the right way?
4. Methodology: Is the paper's idea built on an appropriate conceptual background? Is the research design and methods employed appropriate? Are the data sources and methods described in enough detail to allow the results to be replicated?
5. Findings: Are the results presented in a clear way, highlighting the novelty in the context of existing research?
6. Quality of Communication: Is the paper written in a clear way for readers and the used terminology is appropriate?
7. Declarations: Does the manuscript include the statements on conflict of interest and on the use of generative AI? Are they adequate and consistent with the content of the paper?
8. Research ethics: If the study involves human participants, are there any ethical concerns (e.g. regarding consent or personal data)? If you suspect any research or publication misconduct, please describe it in the confidential comments to the editor.
9. General Comments to the Author:
10. Would you be willing to review a revision of this manuscript?

    Yes No
